

Physics Admissibility Report

Model: NeuralTurb-Flowv3 Model ID: 223355592 Date: 2026-04-04 20:43

These metrics are consistency indicators for declared laws, constitutive closures, and scaling identities on the evaluated sample. They are not a certification of physical correctness.

Overall

Admissibility score: 96.50% — High Admissibility

Governing Laws

Metric	Score	Level
Mass Incompressible	96.50%	High Admissibility
Navier Stokes	88.00%	Moderate Admissibility
Heat Diffusion	35.00%	Non-Admissible

Constitutive relations

Metric	Score	Level
Sutherland Mu Temporal Consistency	96.50%	High Admissibility
Ideal Gas Rho Reference Consistency	98.00%	High Admissibility

Scaling and similarity

Metric	Score	Level
Re Spatial Consistency	96.50%	High Admissibility
Pe Spatial Consistency	70.00%	Low Admissibility
Pr Spatial Consistency	55.00%	Low Admissibility

Data

Metric	Score	Level
U	80.00%	Moderate Admissibility
